OTHER CONSIDERATIONS

Video Rewind Feature

We have added a rewind feature to the video courses, however there is no ability to fast forward the videos. If you rewind the video, you will have to complete watching it from that point forward.

Video Connection Speeds

The seminar videos have been optimized for the best user experience, however please note if you experience any issues with the videos buffering (stopping and resuming play), this is normal and it may be due to the volume of internet connection available at your office or home. If this occurs, please pause the video, hit replay and/or consider viewing the video at another time.
